

Component Services

AMMROC's extensive component overhaul capabilities successfully leverage our strategic relationships with major OEMs: GE, Honeywell, Rockwell Collins, Safran, and Thales, allowing us to optimize the quality and scope of a regional supply chain presence, reducing lead-times of spare parts and turnaround times for AOGs. Our customer-orientated approach to component management and repair helps to reduce your component maintenance costs and increase aircraft availability.

Capabilities and services

- Test, repair and overhaul for F-16 Environmental Control System –components, heat exchangers, valves, air cycle machine and pneumatic starters, bleed valves and starters, achieving a 48 hour turn for an AOG
- Test, repair and overhaul for a range of UH-60 Line Replaceable Units – Main / Tail Rotor Blades, Main / Input Module Assemblies, Tail Gearbox Assembly, Damper / Swashplate / Spindle Assemblies
- Multiple aircrafts – avionics, hydraulics, electrics
- Pneumatics
- Landing gear components
- Wheels / brakes
- Fuel components
- Engine transmission / gearboxes
- Propellers
- Oxygen
